AUTHOR INDEX
VOLUME 33, 1990

Agoston, Maria and Ron Henricksen
"Using Digitizing Signal Analyzers for Frequency Domain Analysis," No. 9, p. 181.

Alford, Andrew
"Higher Modes in Insulating Beads," No. 3, p. 146.

Angenieux, G.
"Broadband Dielectric Characteristics of Aluminum Nitride," No. 10, p. 91.

Anger, Alexander
"Software Computes Maxwell's Equations," No. 2, p. 170.

Armitano, Robert and Roland Hassun
"Digital Demodulation Verifies Accuracy of Advanced Microwave Signal Simulators: Motivation and Theory," No. 6, p. 183.

Armitano, Robert and Roland Hassun
"Digital Demodulation Verifies Accuracy of Advanced Microwave Signal Simulators: Measurement Uncertainty and Implementation Alternatives," No. 8, p. 71.

Ataiiyan, Younes J. and Charles F. Maker
"Four Channel Phase and Amplitude Matched Wideband YIG-Tunable Bandpass Filter," No. 9, p. 157.

Bahl, Inder and Kevin Ely
"Modern Microwave Substrate Materials," SAR, p. 131.

Ballato, Arthur and Ted Lukaszek
"Microwave Acoustic Material Properties," No. 5, p. 105.

Bierman, Howard
"Improved On-Wafer Techniques Evolve for MMIC Testing," No. 3, p. 44.

Bierman, Howard
"Non-Military Microwave Applications," No. 4, p. 190.

Bierman, Howard
"CAD and CAE Applications Range from Circuit Design to Production Yield Control," No. 7, p. 26.

Bierman, Howard
"Material Advances Pave the Way for Device and Systems Improvements," No. 10, p. 26.

Bierman, Howard
"Microwave Applications Range from Under the Soil to the Stratosphere," No. 11, p. 28.

Bomford, Mark
"Selection of Frequency Dividers for Microwave PLL Applications," No. 11, p. 159.

Boulanger, Denis
"Wire Bonding to Soft Substrates," No. 2, p. 159.

Bramanti, Mauro
"Expanding the Frequency Range of a Vector Network Analyzer," No. 3, p. 157.

Braver, Igor M., Pinkhos Sh. Fridberg and Khona L. Garb
"Determination of the Optimum Square Resistance of Absorbing Vanes of the Rotary Vane Attenuator," No. 10, p. 114.

Braver, Igor M., Pinkhos Sh. Fridberg and Khona L. Garb
"Frequency-Independent Waveguide Attenuator with a Resistive Film in the Diagonal Plane," No. 11, p. 179.

Bullock, Scott R.
"High Frequency Adaptive Filter," No. 9, p. 97.

Bybokas, Jim and Bob Hammond
"High Temperature Superconductors," No. 2, p. 127.

Cantalio, Leopold and Edward Kovalcik
"Space-Based Radar Antennas for Weather Observation Missions," No. 1, p. 131.

Casale, Tom, Chuck Davis, Steve Stahly and Ron Trevarrow
"Statistical Data Representation Enhances Component Specification," No. 8, p. 105.

Celliers, A.F.
"Double Coherent Superheterodyne Downconversion in mm-Wave Radar," No. 4, p. 289.

Cohen, Leonard D. and Eugene Sard
"Advances in Microwave and mm-Wave Oscillator and VCO Technology Challenge System Designers' Creativity: Modeling, Design and Performance of Fundamental, mm-Wave, Lumped-Element, Gunn Sources," No. 9, p. 193.

Cohen, Leonard D. and Eugene Sard
"Advances in Microwave and mm-Wave Oscillator and VCO Technology Challenge System Designers' Creativity: Ultra-Wideband, Second-Harmonic, mm-Wave, Lumped-Element, Gunn VCOs," No. 10, p. 121.

Cohen, Leonard D.
"Advances in Microwave and mm-Wave Oscillator and VCO Technology Challenge System Designers' Creativity: Multioctave, Microwave Gunn VCO Sources and Frequency and Temperature Compensation of Lumped-Element Gunn VCOs," No. 11, p. 151.

Cook, Donald
"Mixer Measurement Techniques Using Microwave Tracking Generators," No. 3, p. 127.

Cooper, Thomas L.
"MMIC Production Using MBE: Present and Future," No. 6, p. 105.

Daly, Kevin C. and Gary Smith
"The State of the Art in Time and Frequency Measurements," SAR, p. 149.

Draxler, Paul and Peter Parrish
"Custom-Defined MMIC Libraries Link Simulation and Physical Layout," No. 6, p. 105.

Driscoll, Michael M.
"Advances in Resonator Technology Support Improved Microwave Signal Spectral Performance," No. 6, p. 153.

Duh, K.H.G. and Barbara Craig Adams
"High Electron Mobility Transistors: Mission Accomplished for Voyager and Neptune Encounter," No. 8, p. 123.

Edwin, Allan
"Direct-Digital Synthesis Applications," No. 1, p. 149.

El-Rabaie, S.
"CAD Package for Microwave Integrated Circuit Design," No. 4, p. 275.

Ellowitz, Howard I.
"Company in Transition: An Interview with Dr. Thomas A. Vanderslice, M/A-COM CEO," No. 3, p. 26.

Ellowitz, Howard I.
"The Guard Changes," No. 11, p. 26.

Engelson, Morris
"The Measurement Problem," No. 3, p. 93.

Even-Or, Baruch
"Graphical Analysis of High Speed Nonlinear RF Leveling Loops," No. 12, p. 67.

Frank, Michael L.
"The 2 to 6 GHz, 10 Block GaAs MMIC Amplifier: An Overall Design for a Low Cost Commercial Product," No. 8, p. 83.

Franke, Ernie
"Adjacent Channel Recombination in Analog Repeaters," No. 9, p. 165.

Gabitass, Michael L. Robert K. Froelich and Don E. Peck
"Automated Three-Port S-Parameter Measurements," No. 9, p. 133.

Gelnovatch, Vladimir G.
"MHDL: A Window to the Future," No. 5, p. 26.

Greim, D.C. and C.P. Hu
"Fundamental Frequency Downconversion for Spectrum Analysis of mm-Wave Signals," No. 3, p. 103.

Hartmann, Clinton S.
"SAW Technology: Recent Advances and Future Trends," SAR, p. 73.

Hearn, C.P., E.S. Bradshaw and R.J. Trew
"The Effect of Coupling Line Loss in Microstrip to Dielectric Resonator Coupling," No. 11, p. 169.

Heiss, William H. and David L. McGrew
"Nexrad: Next Generation Weather Radar (WSR-88D)," No. 1, p. 79.

Helkey, Roger
"A New Receiver Filter Transformation," No. 9, p. 207.

Herbert, Stephen
"Integrated Microwave Filters," No. 8, p. 95.

Herbert, Stephen
"Microstrip Interdigital Filter Design," No. 11, p. 187.

Herskovitz, Sheldon B.
"Not Ready for Plowshares . . . Electronic Warfare Checks its Vital Signs," No. 9, p. 26.

Heston, David D. and Randall E. Lehmann
"Monolithic Breadboard: Key to Radical MMIC Size Reduction," No. 4, p. 283.

Ho, T., F. Phelleps, G. Hegazi, K. Pande, H. Huang, P. Rice and P. Pages
"A Monolithic mm-Wave GaAs FET Power Amplifier for 35 GHz Seeker Applications," No. 8, p. 113.

Hovanessian, S.A.
"Microwave, mm-Wave & Electro-Optical Remote Systems," SAR, p. 109.

Huang, C.C. and C.A. McDonach
"Antenna Design for the INMARSAT Second Generation Communication Satellites," No. 2, p. 149.

Huber, S., M. Claassen, W. Harth and H. Grothe
"GaAs PIN Avalanche Diodes for Pulsed V-Band Oscillators," No. 10, p. 107.

Itoh, Tatsuo
"Merging Technologies for the New Decade," No. 4, p. 30.

Joy, Edward B.
"Near-Field Testing of Radar Antennas," No. 1, p. 119.

Kruger, Dennis
"Monolithic Dual-Quadrature Mixer Using GaAs FETs," No. 9, p. 201.

Kumar, Surinder
"Directly Modulated VSAT Transmitters," No. 4, p. 255.

Kushner, Lawrence J.
"Estimating Power Amplifier Large Signal Gain," No. 6, p. 87.

Lan, G.L., J.C. Chen, C.K. Pao, M.I. Herman, M. Sokolich and R.E. Neidert
"A Wideband mm-Wave Monolithic Receiver," No. 2, p. 93.

Lee, T.T., T. Smith, H.C. Huang, E. Chauchard and C.H. Lee
"Optical Techniques for On-Wafer Measurements of MMICs," No. 5, p. 91.

Liu, Cheh-Ming and Chen Y. Ho
"On the Design of a Voltage-Tuned Push-Push Dielectric Resonator Oscillator," No. 6, p. 165.

Lockerd, R.M. and G.E. Crain
"Airborne Active Array Radars Come of Age," No. 1, p. 101.

Luglio, Juan and T. Koryu Ishii
"High Efficiency FET Microwave Detector Design," No. 12, p. 93.

Lyons, B.N., I. Sheridan, F. Sheehy and W.M. Kelly
"A Satellite-Based Multichannel mm-Wave Receiver Implemented Using Quasi-Optical Demultiplexing," No. 6, p. 197.

Lyons, W.G. and R.S. Withers
"Passive Microwave Device Applications of High T_c Superconducting Thin Films," No. 11, p. 85.

Maas, Stephen A.
"Analysis and Optimization of Nonlinear Microwave Circuits by Volterra-Series Analysis," No. 4, p. 245.

Maas, Stephen A.
"Microwave Mixers in the 90s," SAR, p. 61.

Mailloux, Robert
"Microwave and mm-Wave Array Antennas," SAR, p. 17.

Maury, Mario A., Jr.
"Microwave Coaxial Connector Technology: A Continuing Evolution," SAR, p. 39.

Maze, G., J.L. Bonnefoy, and M. Kamarei
"Microwave Measurement of Dielectric Constant Using a Sliding Short Circuited Waveguide Method," No. 10, p. 77.

McCreddin, Steve
"The Dynamics of Microwave Sales Representatives or How Most Parts Get Sold," No. 10, p. 45.

Meaney, Paul M.
"A Novel Transition from Waveguide to Microstrip," No. 11, p. 145.

Michelson, M., W.W. Shrader and J.G. Wieler
"Terminal Doppler Weather Radar," No. 2, p. 139.

Milton, Curtis E.
"Implementing Local Oscillators for EW Systems," No. 6, p. 121.

Nessmith, J.T.
"Modern Radars and Antennas," No. 1, p. 26.

Nirenberg, A. and G.W. Bruner
"Development of a Radar Cross Section Standard and Its Use in Calibrating Moving Targets," No. 6, p. 212.

Nuthalapati, C.
"High Resolution Spectrum Analysis for Airborne Pulsed Doppler Radars," No. 2, p. 113.

Ogden, Cameron
"The Impact of Process Capability on the Manufacturability of Microwave Circuit Boards," No. 4, p. 267.

Panicker, M.P. Ram, Gary Sadowniczak and Vince Leon
"Thermal Substrates: A New Microwave Substrate Technology for Thermal Management and Low Parasitic Elements," No. 10, p. 99.

Patterson, Howard, Tim Kajita and Chen Y. Ho
"Design of a Wideband Miniature Microwave Converter with Wide Dynamic Range," No. 9, p. 115.

Pengelly, Raymond S.
"CAD for MMIC Implementation," No. 8, p. 26.

Perry, R.W., T.T. Ellis and E.R. Schineller
"MMIC Packaging with Waffleline," No. 6, p. 175.

Peterson, Dean F.
"The Varactor Power Frequency Multiplier: A Device for Quietly Extending the Range of Microwave Power Devices," No. 5, p. 135.

Petted, Brian E.
"Oscillator Computer-Aided Design Process Utilizes S-Parameter and Time Domain Techniques," No. 7, p. 91.

Potter, Larry D.
"Test Instrumentation Measures Up to the Needs of System Developers," No. 3, p. 39.

Primas, Lori E.
"Cable Delay Compensator for Microwave Signal Distribution over Optical Fiber," No. 12, p. 81.

Pyndiah, Ramesh, R. LeBlanc and J.P. Ballage
"GaAs MMIC Direct Linear Vector Modulators," No. 3, p. 136.

Ramachandran, T.B.
"Gallium Arsenide Power Sources," SAR, p. 91.

Roth, B., M. Joseph and A. Beyer
"A Varactor-Tuned Oscillator Using MMIC Technology," No. 9, p. 223.

Rubin, David
"De-Embedding mm-Wave MICs with TRL," No. 6, p. 141.

Saloom, Joseph A. and George Caryotakis
"The Microwave Component Industry: Two Views of the Future," No. 9, p. 47.

Shen, Zhi-Yuan
"Designing Broadband Hermetically-Sealed Interfaces Using the Latest Technology," No. 5, p. 147.

Sigmon, Bernard E.
"A High Peak Power Solid-State Source for Low Duty Cycle Applications," No. 9, p. 215.

Smith, P.M., P.C. Chao, J.M. Ballingall and A.W. Swanson
"Microwave and mm-wave Power Amplification Using Pseudomorphic HEMTs," No. 5, p. 71.

Sorrell, Perry A.
"Microwave Modules on Dual-Dielectric Constant Materials," No. 10, p. 130.

Staprans, A. and R.S. Symons
"The 1990 Microwave Power Tube Conference," No. 12, p. 26.

Staudinger, Joseph
"Wide Bandwidth MMIC Power Dividers: Implementation and a Practical Design Technique," No. 2, p. 73.

Staudinger, Joseph and Warren Seely
"An Octave Bandwidth 90° Coupler Topology Suitable for MMICs," No. 11, p. 117.

Stiglitz, Martin R.
"The 1989 IEEE GaAs IC Symposium and the 1989 Conference on GaAs Manufacturing Technology," No. 1, p. 36.

Stiglitz, Martin R.
"1989 Milcom Conference," No. 2, p. 28.

Stiglitz, Martin R., Christine Blanchard and Julie Callahan
"Attending the Conference," No. 4, p. 40.

Stiglitz, Martin R. and Christine Blanchard
"Over-the-Horizon Backscatter Radar," No. 5, p. 32.

Stiglitz, Martin R. and Christine Blanchard
"RDT&E Budget Realities and Priorities in the 1990s," No. 6, p. 26.

Stiglitz, Martin R. and Christine Blanchard
"What Happened at the MTT-S Conference?," No. 7, p. 40.

Stiglitz, Martin R. and Christine Blanchard
"A Laser Radar Experiment," No. 9, p. 37.

Stiglitz, Martin R. and Christine Blanchard
"Antenna Measurement Techniques Symposium," No. 9, p. 65.

Stiglitz, Martin R. and Christine Blanchard
"Microwave Conferences in Other Lands," No. 11, p. 47.

Stirling, Ronald C.
"Frequency Synthesizers for Telemetry Receivers," No. 7, p. 99.

Talisa, S.H., J.D. Adam and M.R. Daniel
"Magnetostatic Wave and Magnetostatic Wave-Optic Filter Technology," No. 11, p. 105.

Terret, C., P. Coquet, A. Boulouard, K. Mahdjoubi, J. Saillard and J.P. Daniel
"A Modular mm-Wave Reflectometer," No. 12, p. 103.

Thompson, James H. and Thomas R. Apel
"Simplified Microstrip Discontinuity Modeling Using the Transmission Line Matrix Method Interfaced to Microwave CAD," No. 7, p. 79.

Trew, R.J.
"MESFET Models for Microwave Computer-Aided Design," No. 5, p. 115.

Wang, Sining, Fadhel M. Ghannouchi and Renato G. Bosisio
"A Wideband Microstrip Coupler with Tight Coupling Levels," No. 9, p. 227.

Wassel, John
"GTT for MTT," No. 4, p. 34.

Weinschel, Bruno O.
"Errors in Coaxial Air Line Standards Due to Skin Effect," No. 11, p. 131.

White, Paul M., Walter R. Curtice, Mary A. Hendrickson and Wayne H. Chang
"Large Signal Design: Performance and Simulation of a 3 W C-Band GaAs Power MMIC," No. 4, p. 235.

Whittaker, N., A. Derderian and Paul Tsoi
"A Novel RF Switch for High Power Space Application," No. 10, p. 127.

Yiwei, Chen and Wang Su
"Extra Wideband FET Distributed Circuits," No. 6, p. 205.

York, R.A. and R.C. Compton
"An Automated Method for Dielectric Constant Measurements of Microwave Substrates," No. 3, p. 115.
